

Can I use my own logo on the quote and order documents?

Last revised Monday, 23 January 2012

Yes you can use your own logo and here is how to do it.

As of Version 3.0 of ShedTech there is now a menu button that will allow you to reference and use your logo on all documents produced by ShedTech.

To specify the logo to display use:

Tools > Quote Settings > Company Logo

Your logo must be in either **JPG**, **GIF** or **PNG** format and you will need to make this setting on each company.

If for some reason ShedTech can not locate your logo in the future, the default ShedTech logo will be used.

Logo Tips

- For each document produced by ShedTech there is a 40mm x 30mm area for a logo. ShedTech will isometrically scale your logo to fill this area.
- Any resolution image can be used. If your logo is too small, ShedTech will still scale it to fill the logo area. This may mean your logo appears pixelated.
- Where possible, your logo should have a white or transparent background (as paper is white).
- Beware of any white-space around the edge of your logo in the image file, as this will also take up space in the area for your logo.
- The PDFs created by ShedTech are high in quality and any low resolution image used as
