

The TBA acronym standard for **To Be Advised**.

In order for any ShedTech product to assign you a quote number, you need to be connected to the internet when using the software. If you are not connected to the internet, ShedTech will still allow you to generate a quote but the document will print with a TBA quote number.

All ShedTech products have the ability to operate in an "off-line" mode for up to 7 days. This allows you to generate quotes at times when you don't have an internet location or at remote locations.

The next time you start the ShedTech software, the quote that you produced off-line will be uploaded to the ShedTech web server. At this time, the quote will be assigned a unique quote number. You should advise the customer of the quote number or reprint or email the quote with the new number.
